

DUMPHRIES A VILLAGE FACT SHEET 2016

This “Fact Sheet” provides basic information on population changes and demographics for Dumphries A village. Whenever you use this information, please reference it as being obtained from MRC/Wits Rural Public Health and Health Transitions Research Unit (Agincourt).

Villages in the Agincourt Health and Socio-Demographic Surveillance (HDSS) System Research Site in 2014 include:

Agincourt, Belfast, Croquet Lawn, Croquet Lawn B, Cunningmore A, Cunningmore B, Dumphries A, Dumphries B, Dumphries C, Huntington, Ireagh A, Ireagh B, Ireagh C, Justicia, Khaya Lami, Kildare A, Kildare B, Kumani, Lillydale A, Lillydale B, Makaringe, MP Stream, Newington B, Newington C, Rolle C, Somerset, Somerset C, and Xanthia.

Village Growth and Population over the Period 2008 - 2015

The numbers shown below are calculated according to numbers for the end of June 2015. The numbers are known as mid-year population figures.

Mid-year Figures of Dumphries A, 2008 and 2014		
	2008	2015
Households	392	463
Population	2 344	2 642
Male	1 117	1 247
Female	1 227	1 395
Children under 5	292	301
Children of school-going age (5-19)	795	825

Below you can see how many people were living in Dumphries A village of different ages in June 2015.

Mid-Year Population of Dumphries A village, 2015			
Age Group	2014		
	Male	Female	Total
0-4	134	167	301
5-9	167	154	321
10-14	129	126	255
15-19	117	132	249
20-24	133	136	269
25-29	144	134	278
30-34	110	123	233
35-39	91	85	176
40-44	48	77	125
45-49	45	64	109
50-54	34	51	85
55-59	27	44	71
60-64	29	29	58
65-69	21	14	35
70-74	12	17	29
75-79	6	15	21
80-84	1	9	10
85-89	3	14	17
90-94	0	3	3
95+	0	0	0
Total	1 251	1 394	2 645

You can compare the population structure between Dumphries A village and the Agincourt HDSS research site (1994 and 2015) by looking at the population pyramids below.

Dumphries A Population Pyramid, 2008

Agincourt HDSS Population Pyramid, 2015

Agincourt HDSS Original Population Pyramid, 2008

Agincourt HDSS Population Pyramid, 2015

Take home message: The number of households in Dumphries A village has increased since 2008. The population has also grown between the years of 2008 and 2014. The population structure of Dumphries A village strongly follows the structure of the Agincourt HDSS research site.

Births

Number of Births by Gender

The number of births recorded in Dumphries A village is shown below. We can only provide data to the end of 2014.

Births by Gender in Dumphries A Village, 2008 and 2014		
	2008	2014
Male Births	37	22
Female Births	43	36
Total Births	80	58

The numbers of births show a downward trend in Dumphries A village. In 2014 there was a decrease in the number of births.

Crude Birth Rate (how many babies born for every one thousand people)

We compared the birth trends in Dumphries A village with the rest of the Agincourt HDSS research site in the graphs below.

The crude birth rate is found by comparing the number of babies born to the total population. For example, above, for every 1000 people living in Dumphries A village in the year 2014, 22 babies were born.

When you compare the crude birth rates in Dumphries A village with the crude birth rate for the whole of the Agincourt HDSS research site, they are relatively similar. One difference is that Dumphries A had a decrease in births in 2014 and Agincourt HDSS did not.

Births by Mother's Age and Age Specific Fertility Rates

Research within the Agincourt HDSS research site continues to look closely at fertility. You can see the number of babies born to mothers of different ages in Dumphries A village below.

Births by Age group in Dumphries A, 2008 and 2008		
Age Groups	2008	2014
10-14	1	1
15 -19	22	7
20-24	25	17
25-29	17	18
30-34	6	11
35-39	5	3
40-44	4	1
45-49	0	0
Total Births	80	58

We can also look at trends across the whole site and compare them with Dumphries A village.

We find the age specific fertility rate by looking at how many women in a certain age group have had babies in a certain year. For example, we can see that in the year 2014 in Dumphries A village, for every 1000 women ages 15-19, about 55 of them gave birth.

Take home message: 2014 saw significant decreases in fertility in ages 15-19 and 35-39.

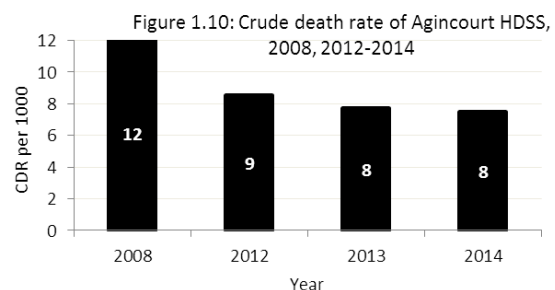

Deaths

Deaths

The MRC/Wits Agincourt Unit only gives *numbers* of deaths for each age group in each village, not the *cause* of death. The number of deaths occurring is low and if the cause of death is given, then a person's confidentiality may be broken. Below you can see the total number of deaths that occurred in Dumphries A village in 1994 and in 2014.

Deaths by Gender in Dumphries A, 2008 and 2014		
	2008	2014
Male Deaths	9	4
Female Deaths	12	9
Total Deaths	21	13

Below you can compare the crude death rates over the same period in Dumphries A village and across the Agincourt HDSS research site.

The crude death rate is found by looking at how many people died for every 1000 people living in the population. For example, in 2014, for every 1000 people in the population of Dumphries A village, 5 died.

The data shows that the crude death rate has increased greatly from the levels seen in 1994, across the whole population of the Agincourt HDSS research site. However, there is a suggestion that the death rate may be falling. We need to carry on watching these figures to see if this is really a trend. We are beginning to think that there really is a downward trend in death rates, probably because of the increase in ARVs for people with HIV.

MIGRATION

Permanent migration pattern

Below you can see how many people have moved in to and out of Dumphries A village permanently.

In-Migrants by Gender in Dumphries A village, 2008 and 2014		
	2008	2014
Male In-Migrants	47	29
Female In-Migrants	91	52
Total	138	81

Out-Migrants by Gender in Dumphries A village, 2008 and 2014		
	2008	2014
Male Out-Migrants	43	26
Female Out-Migrants	85	56
Total Out-Migrants	128	82

Take home message: The number of people permanently moving in and out of Dumphries A village is decreasing. It is important to understand how many people are moving in and out of the village.
